Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Response to Amendment

The claim objections and rejections described in the office action mailed on April 5, 2005 have been withdrawn in view of the amendment filed on September 27, 2005. The applied prior art does not disclose or suggest a gas turbine fuel oil having the claimed characteristics.

A new rejection follows.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-17 and 20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicants are claiming a method for producing a gas turbine fuel oil having specific characteristics including a viscosity within a set range, metal concentrations within set ranges, and sulfur amounts within a set range. This fuel oil is also produced in yields within a claimed range. In processes such as presently claimed, the final product depends on a number of factors including the composition of the feed oil, conditions used in the distillation, separating, and hydrotreating steps, and the composition of the catalyst used in the hydrotreating steps.

Art Unit: 1764

Additionally, the predictability of catalytic processes is low. Since the claims do not include any specific conditions required to produce the product and the specification does not disclose a combination of feed types, conditions, and catalysts that can be used to produce the claimed product, one of ordinary skill would have to perform a level of experimentation that is undue in order to perform the claimed invention to produce the claimed product.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter D. Griffin whose telephone number is (571) 272-1447. The examiner can normally be reached on M-F 6:30 to 4:00 with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
